Passport™ P-Series Console Amplifier

The Passport-P Console amplifier connects easily to Plantronics® headsets

Key design features have gone into the making of this reliable amplifier. The Plantronics-compatible quick disconnect attaches to the quick disconnect on Plantronics headsets for easy integration into call centers that use Plantronics headsets.

We've incorporated a bit of flexibility in the amp housing to accommodate slightly wider spaced prong slots on some telephones. Volume adjustments are easily accessible. Unlike competitive products, the headset cord is positioned to the side of the amplifier rather than directly in the middle, which reduces stress on the cord resulting in fewer repairs.

Features 9 ft expandable coil cord with Plantronics-compatible quick disconnect
